

# How do I create Groups in Moodle?

Here is a link to more information about groups on the Moodle Site:

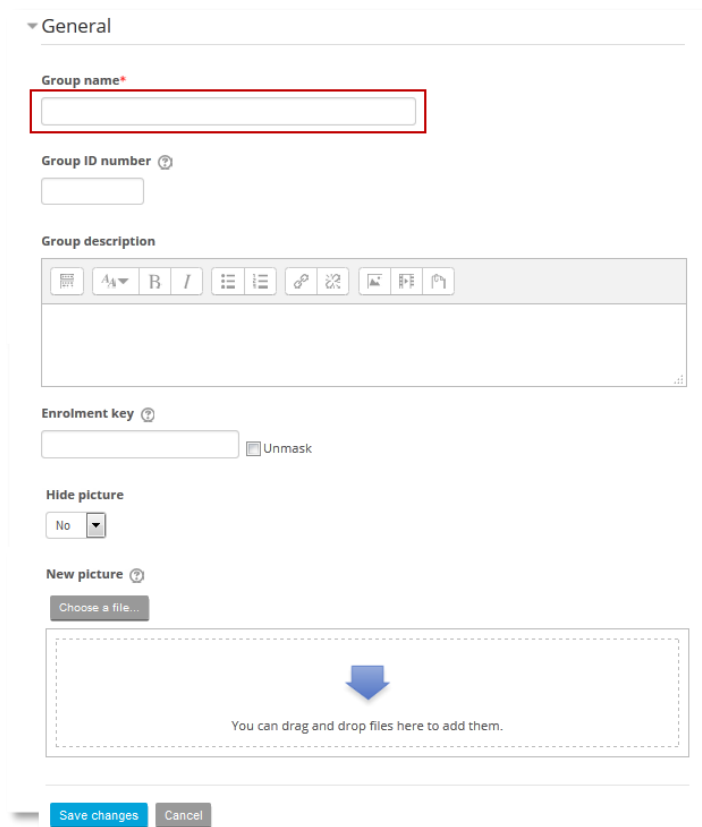

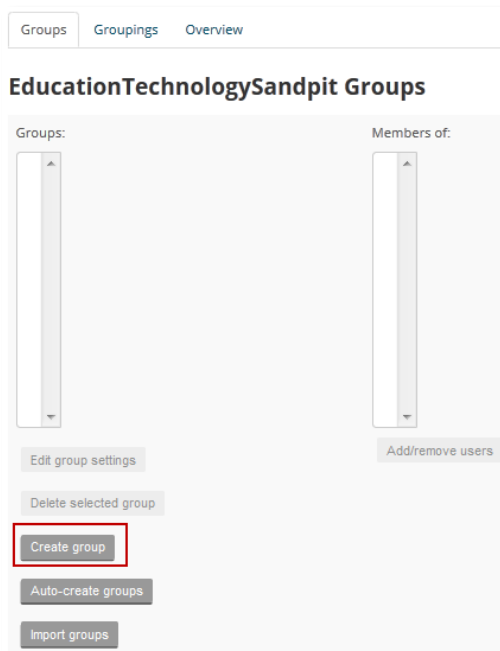

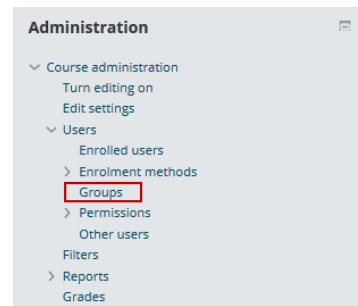

<https://docs.moodle.org/23/en/Groups>

## Why use Groups?

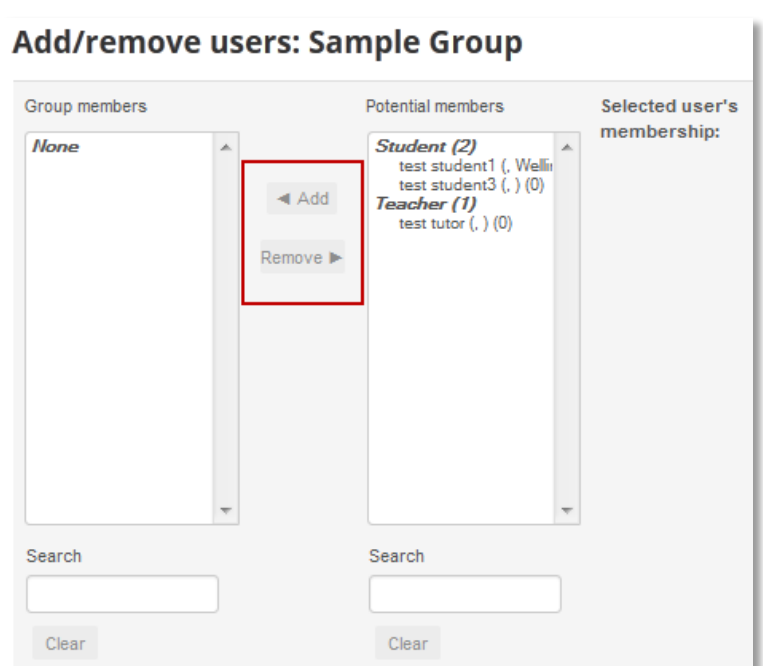

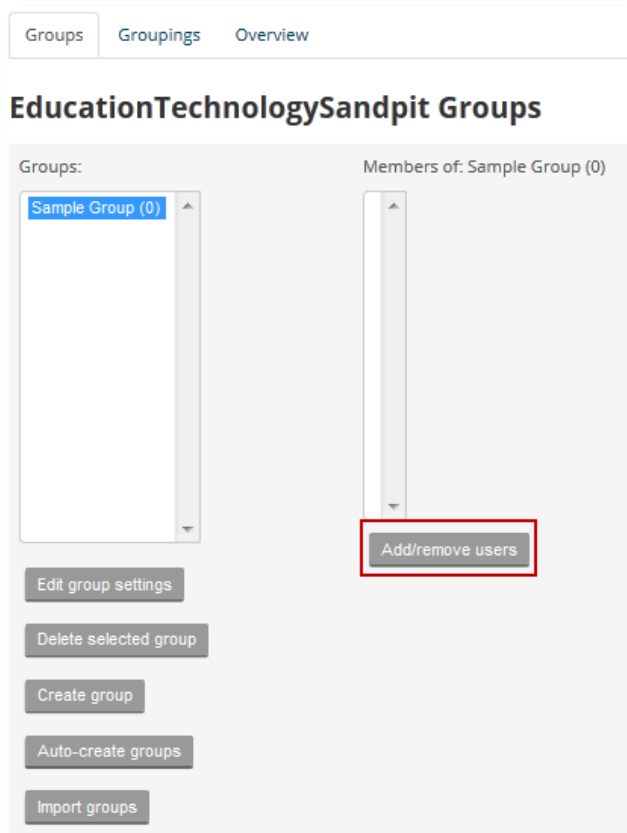

- You teach more than one class on a particular course and you want to be able to see one class at a time
- To share courses with staff and not see their student's work.

## Creating a Group

1. Log into Moodle
2. Click on the course you want
3. In Settings
4. Scroll down until you see the **Administration** block
5. Click: **Users > Groups**
6. Click: **Create group**
7. Name the Group and click: **Save changes**

8. Click on the group you have created
9. Click: **Add/remove users**
10. Select names from the available list or search by typing the name
11. Click: **Add**
12. Repeat to add more users

## Why use Groupings?

- If you want to make an activity (such as an assignment or a quiz) visible to only one set of users within a course, you need first to put the users into a group and then put them into a grouping. A single grouping can house one group or several groups.
